Legiant Portal Authentication Provides One Click Access to Time and Attendance System

AUSTIN, TX – October 28, 2008 – Legiant, a leading provider of time and attendance software, announced the release of their latest product enhancement, Legiant Portal Authentication. Legiant Portal Authentication allows users to access the Legiant timecard system by using their Windows login information, eliminating the need for users to memorize a separate username and password to access their time keeping system. Building on the existing ability to use Single Sign On via Active Directory authentication for non-hosted systems, this exciting new ability provides a new level of security and convenience. By adding more intuitive features to Legiant Timecard™, Legiant continues to provide small-to-midsize businesses with the most effective time and attendance software.

For clients on the Legiant SaaS hosted service, Legiant Portal Authentication allows local Active Directory authentication for Legiant Timecard access. By adding the Legiant Portal, a user can be authenticated within the local network using Microsoft Active Directory™, granted a session on Legiant Timecard through an API call, and directed to their timecard. “We developed the Legiant Portal in response to our customers who wanted to make logging in to the Legiant Timecard system easier for their employees” said Rod Crane, CTO of Legiant. “Now employees have one less password to worry about. Encouraging feedback from our customers has allowed us to develop a time and attendance product that truly benefits its users.”

For employees that may share the same workstation, the Legiant Link is also available. The Legiant Link operates in the same way as the Legiant Portal, but requires the current user to enter their Windows username and password again before accessing their timecard. By focusing solely on time and attendance, Legiant is able to quickly develop and implement the latest technology with its time accounting software.

About Legiant

Legiant time and attendance software delivers immediate improvements in workforce productivity through rapid implementation, unsurpassed user acceptance and the ability to comply with a wide range

of requirements. For over a decade, Legiant has been leading the way in the time and attendance industry with features like zero-footprint installation, automatic workflow notifications, web-based solutions, mobile attendance tracking, leave tracking and much more. Flexible time clock software solutions help Legiant's enterprise customers maximize the profitability and productivity of their workforce. Legiant integrates software, hardware, and professional services to create a comprehensive time tracking solution, easy-to-use and accessible from anywhere through a Web-based interface. Legiant integrates with the majority of payroll systems and supports biometric data collection devices. Legiant is the ultimate solution for small-to-midsize businesses.
